

## Laboratory and Diagnostic Study Consent

All laboratory analyses and diagnostic studies performed at or arranged by any CareHere facility will be reviewed by a CareHere medical provider. In all instances, it is your (the patient's) responsibility to schedule a follow up appointment so that the labs or diagnostic results can be discussed in person with a physician or medical provider.

Should the patient choose to see a non-CareHere physician for review of their labs or study results, some type of communication will likely be initiated from the CareHere staff (via email or phone call) to confirm that appropriate follow up has occurred. In the event you have not been contacted by the CareHere facility, do not assume that your results are normal. Please understand, we cannot guarantee abnormal results will be communicated to you unless you schedule a follow up appointment to review the results.

The goal at the CareHere Health and Wellness Center is to achieve excellence in patient care. We ask that our patients assist us in this goal by scheduling a follow up appointment at the time labs or studies are performed and by keeping us informed about any relevant outside medical evaluations.

Signing below confirms you have read and understood this CareHere Laboratory and Diagnostic Study Policy. Signing below also indicates your full understanding that it is your (the patient's) responsibility to assure that medical follow up occurs after every lab and diagnostic study performed or orchestrated through a CareHere facility. You will be required to sign this consent form annually and will be reminded of the policy each time lab work is performed.
